

Choose a Biomag® Clinic magnetic therapy set

Lumina MD1 set

This is the recommended set for modern sites, which allows the majority of requirements for applications of the patented 3D Biomag® magnetic therapy to be met. Therefore, it is suitable for large sports-relaxation centres, rehabilitation centres, modern hospital centres and clinics.

Other suitable Biomag® Clinic magnetic therapy sets

Lumina MD6-STOM set

This set has been developed for stomatology surgeries with optional application for two patients at the same time.

Lumina MD7-SPORT set

This set is available in various versions and is primarily intended for use in sports clubs and regeneration facilities, for treating injuries and cricks brought on playing sports.

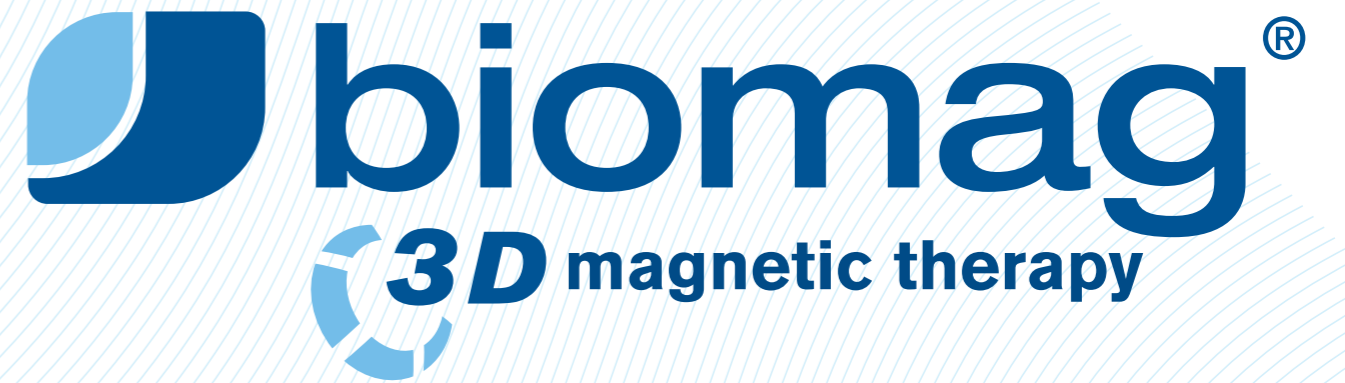

Recommended accessories

Choose other attractive applicators from the list specified for your set. AL115-3D-COMBI (Omega 3D) is a very suitable applicator intended particularly for the cervical spine area and shoulders. Other Biomag® original accessories and options are suitable for convenient operation as well.

Other available devices

AL96-2C (Gama)
w. 460 mm, l. 960 mm, h. 34 mm

AL135-3D (Epsilon 3D)
w. 460 mm, l. 1,350 mm

AL180-3D (Delta 3D)
w. 720 mm, l. 1,800 mm, h. 25 mm

Colour versions of applicators and devices

Biomag® Monada plus

New quality in rehabilitation

biomag[®] Lumina Clinic

A unique, technically advanced device that generates high-precision pulses with a specifically formed electromagnetic field in new, original Biomag[®] applicators with a new, patented design.

Adapted to your angle of view

Biomag[®] Lumina magnetic therapy device has been developed to provide convenient and intuitive control for medical staff. Medical employees will appreciate not only the extensive menu of therapeutic programs but also the easy and fast control, ergonomic design and great operating features of the device.

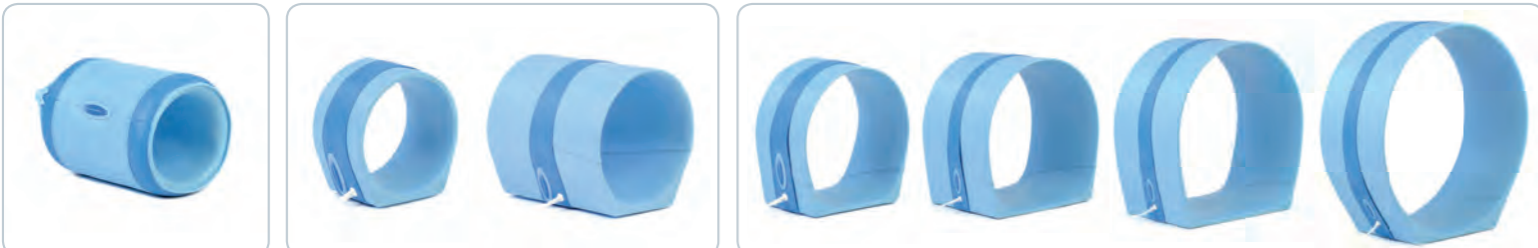

3D Patented technology
patented rotary magnetic field

High efficiency, quality, satisfied users

Devices and applicators in the Biomag[®] magnetic therapy range provide highly effective treatment programs. Thanks to top-quality fabrication, they have been serving professionals worldwide for many years. Satisfied users are our main priority.

Biomag[®] applicators – solenoids (ring)

SL19 (Sigma 1)
Ø 190 mm, d. 310 mm

SL20-3D (Sigma 8) **SL30-3D** (Sigma 9)
Ø 200 mm, d. 140 mm Ø 300 mm, d. 340 mm

SL30-P (Sigma 3)
Ø 300 mm, d. 170 mm

SL50-P (Sigma 5)
Ø 500 mm, d. 340 mm

SL60-P (Sigma 6)
Ø 600 mm, d. 340 mm

SL70 (Sigma 7)
Ø 700 mm, d. 300 mm

Biomag[®] applicators – flat and combined

AL79-2C-COMBI (Omega 2)
w. 430 mm, l. 790 mm, h. 28 mm

AL115-3D-COMBI (Omega 3D)
w. 430 mm, l. 1,150 mm, h. 28 mm

AL16-LUM (Alfa)
w. 130 mm, l. 165 mm, h. 24 mm

AL21 (Beta)
w. 160 mm, l. 210 mm, h. 28 mm

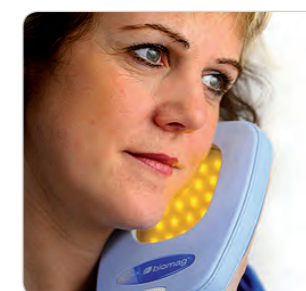

AL60-3D (Kappa)
w. 220 mm, l. 600 mm, h. 34 mm

4 outputs (3+1 or 2+2) option of independent treatment of 2 patients

both mains- or battery-operated (enables multipurpose use, both stationary and at the patient's bedside)

108 preset programs with text selection
65 memory positions for custom settings

button-controlled or touch-screen controlled
fast navigation
integrated catalogue with information on programs

optional combination of the pulsed magnetic field and polarised light in the Biomag[®] AL16-LUM (Alfa) applicator using contactless applications, usable in stomatology, too

multi-language device menu, including operating instructions

Therapeutic bed for the SL70 (Sigma 7) solenoid

Allows convenient application for patients, fast and efficient operation for medical employees.

Application stand for Biomag[®] magnetic therapy devices and applicators

Enables portability of the whole device and contactless application using the AL16-LUM (Alfa) application arm. In space-limited environments, during applications above the bed, the application stand can be pushed under the bed.

Great Biomag[®] solenoids

Ring applicators are equipped with the **thinnest** base for convenient application.
